ABOUT DR. S.S. TONI

Born in 1914, Dr. Stephen S. Toni graduated from the University of Manitoba Faculty of Medicine in 1936. In 1938, he was invited to take up practice in Altona, where he remained for his 45 year long career. From 1938-1983, Dr. Toni delivered more than 4,000 babies to several generations of families in the area. His legacy continues in the creation of this scholarship fund, creating opportunities for new generations of healthcare workers from the area that he spent his career serving.
